## PROFILE

Full Stack Developer around 3 years of experience building and maintaining scalable web applications using **JavaScript, TypeScript, React.js, Next.js, Node.js** and **Express.js**. Skilled across the full development lifecycle—from designing responsive frontend interfaces to developing robust **REST/GraphQL APIs** and integrating **SQL/NoSQL** databases. Experienced in API documentation with **Swagger**, implementing **LLM**-based features, and writing maintainable, tested code using **Jest**. Strong problem-solving abilities, clean coding practices, and a proven ability to collaborate in agile environments to deliver high-quality, user-focused solutions.

## WORK EXPERIENCE

### 2023 - PRESENT

Affixious Consulting Pvt. Ltd, Noida, UP

#### Software Engineer

- Developed scalable backend services using Node.js, Express.js, and GraphQL for flight, hotel, and holiday booking platforms.
- Built responsive and high-performance frontends with React.js, Next.js, and Redux.
- Created custom CMS panels to manage hotel listings, newsletters, and holiday packages.
- Built a newsletter platform using Next.js with GraphQL APIs for content delivery.
- Integrated .NET Core APIs to support external services and data exchange.
- Upgraded legacy projects to newer versions of Next.js and Redux, improving speed and maintainability.
- Wrote unit tests with Jest to ensure code reliability and reduce production issues.
- Implemented CI/CD pipelines to automate deployments and improve release cycles.
- Mentored two junior developers, improving code quality and team productivity.
- Collaborated with cross-functional teams to gather requirements and deliver business-aligned features.
